Welcome to Minuteman Press Cambridge

We've been proudly printing for Cambridge since 2009

When we started this business, we noticed there was a gap in the market for a printing company who were customer focused, rather than simply driven by the size of the order. We wanted to provide a place where all orders were treated with the same degree of care and attention, large or small.

Our promotional brochure is a small insight into what is possible. So, if you are looking for event items, eco products, corporate gifts, or staff recognition, talk to us, we are here to help.

USB Sticks

Twister USB

The Twister is the unsung hero of the USB memory stick world and by far our most popular model. The main reasons for this is down primarily to how much customisation is actually possible with this product. Not only does the Twister USB come as standard with a range of colours to choose from, but we can also colour match the body of the memory stick to match company branding. The metal clips are also available in a variety of colours and finishes and rotate a full 360-degrees around for easy use.

Credit Card USB

The USB Card is the same size as a standard credit card or bank card, making it ideal for placement in a wallet or purse, and is therefore one of the most easily portable USB's on the market. At only 3mm thick it is only marginally thicker than a regular credit card. The USB connector simply "flips" out making it easy to use.
